FULL-SERVICE AIRPORT CONSULTING

Summer 2011 Internship

Landrum & Brown is actively seeking qualified candidates for a *paid, full-time* internship position in our Chicago Office to begin in June 2011. Those interested in an internship should be completing or graduated from a Bachelor or Master Degree program with a specialization in aviation, business administration, management, planning, environmental sciences, or related fields.

Primary job responsibilities will include involvement with all aspects of environmental planning and compliance including; sustainability planning, environmental assessments, environmental impact studies, Part 150 noise compatibility studies, and technical aspects such as noise measurements, noise contours, GIS databases and mapping assistance for worldwide airports and regulatory entities. Potential job responsibilities also include involvement with planning studies and analyses regarding airport facilities and operations, terminal planning, financial planning, development of Master Plans, landside planning, gate management and allocation, terminal planning, and forecasting.

To apply, please e-mail your resume and cover letter to:
